

I'm looking for
a change from my usual
drench. So **CONVERGE**
is my choice for
the ewes this season.

CONVERGE: Smart Alternative

It is important to stay one step ahead of worms. So if you are concerned about drench resistance and looking for a change after regular use of a white and clear combination, then drench your ewes with CONVERGE.

As an ML and clear combination, CONVERGE is the smart alternative.

KEEP WORMS GUESSING.

After regular use of a white and clear combination, CONVERGE is the smart alternative for your ewes.

Registered pursuant to the ACVM Act 1997, No: A10119. CONVERGE is a registered trademark of Schering-Plough Animal Health Limited, 33 Whakatiki Street, Upper Hutt, New Zealand. Phone: 0800 800 543. CON-293-2009.

It helps reduce pasture contamination and reduces the stress and energy drain of worms. This keeps your ewes in peak condition at key times such as pre-lambing and tailing/docking.

The low-dose formulation means a smaller dose – ideal for ewes. As an added advantage you can use CONVERGE for cattle too.
