SCANDA: Smart Choice

As a leading white and clear combination, SCANDA is the first choice for drenching your ewes. It helps reduce pasture contamination and reduces the stress and energy drain of worms. This keeps your ewes in peak condition at key times such as pre-lambing and tailing/docking.

SCANDA is recommended where there is a history of single drench family use, including MLs and where there is concern about drench resistance.

Registered pursuant to the ACVM Act 1997, No's: A7130 and A7368. SCANDA is a registered trademark of Schering-Plough Animal Health Limited, 33 Whakatiki Street, Upper Hutt, New Zealand. Phone: 0800 800 543. SCA-292-2009.

It can also be used as an entry and exit drench alongside long-acting drenches to remove any resistant worms present.

The low-dose formulation means a smaller dose — ideal for ewes. As an added advantage you can use SCANDA for cattle too.

SCANDA is the smart choice to keep ewes in peak condition at key times.
