**Engineering controls**

The health hazard risks of handling this material are dependent on many factors, including physical form, duration and frequency of process or task, and effectiveness of engineering controls. Site-specific risk assessments should be conducted to determine the feasibility and the appropriateness of all exposure control measures. Exposure controls for normal operating or routine procedures follow a tiered strategy. Engineering controls are the preferred means of long-term or permanent exposure control. If engineering controls are not feasible, appropriate use of personal protective equipment (PPE) may be considered as alternative control measures. Exposure controls for non-routine operations must be evaluated and addressed as part of the site-specific risk assessment.

**Section 9: Physical and Chemical Properties**

Appearance	White liquid with slightly chalky odour
Boiling Point	100°C
Melting/Softening point	Not applicable
Vapour Pressure	Not determined
Specific Gravity	No information available
Solubility (H <sub>2</sub> O)	Dispersible
Percent Volatiles	Not determined
Evaporation Rate	Not determined

**Section 10: Stability and Reactivity**

<b>Stability of the substance</b>	Stable under normal conditions.
<b>Conditions to avoid</b>	Avoid high temperatures
<b>Material to avoid</b>	Avoid food products
<b>Hazardous decomposition products</b>	No dangerous decomposition is expected if used according to manufacturer's specifications.

**Section 11: Toxicological Information****Acute effects for individual ingredients only**

ORAL	LD <sub>50</sub> (mouse) > 10000mg/kg
TEL	No TEL is set for this substance at this time.
